

Title: Python Django Developer

Description: Help build great tech for hard places by writing awesome code!

Location: Berlin / Kano

We're an American-Nigerian NGO specialised on the development of software. Currently our main task is to develop a tool set to tackle the Ebola outbreak in West Africa. Our diverse Team of 20 is located in Berlin, with various team members currently on site in Nigeria, Sierra Leone, Liberia and Guinea.

We're now looking for a **full time Python / Django Developer** (freelance) to join us, starting as soon as possible.

Your skills & experience

- At least 3 years of experience with Python and Django
- Excellent database and operations skills
- Strong knowledge of OSI Model
- Familiarity with Nginx, PostgreSQL, Django Rest Framework, Docker
- Good understanding of git flow
- Excellent communication skills and self-initiative
- Language Skills: fluent English is a must, German, Spanish and French are nice-to-haves
- Location: Berlin, Germany or Kano, Nigeria

Your tasks

- maintain Django apps
- peer code review
- write tests
- dev-ops

Sounds good to you? Contact us!

If you're interested, please contact us with a few short lines about yourself (please keep them really short) and your CV: recruitment_berlin@ehealthnigeria.org

We're looking forward to hearing from you!
